

ABHYUDAI CHIRUMALLA

Product Manager | Enterprise SaaS · AI & Automation · Platform Products

Hyderabad, India | +91 9440008003 | abhyu.chirumalla@gmail.com | linkedin.com/in/abhyudai-chirumalla

PROFESSIONAL SUMMARY

Product Manager with ISB Post-Graduate Programme in Product Management & GenAI and 8 years in enterprise SaaS at UiPath, working at the intersection of customers, engineering, and product. Led customer discovery across 50+ enterprise accounts, contributing to 50+ shipped product improvements and a 30% YoY reduction in repeat incidents. Strong in problem framing, PRD authorship, requirements definition, and translating customer pain into roadmap priorities. Seeking APM/PM roles in enterprise SaaS, AI/automation, and platform products.

CORE COMPETENCIES

Product Management: Product Strategy · Roadmap Prioritization (RICE, MoSCoW) · PRD Authorship · User Stories · Customer Discovery · User Research · Competitive Analysis · MVP Definition · GTM Strategy · A/B Testing · Stakeholder Management · Backlog Management · Agile / Scrum

Analytics & Tools: SQL · Excel / Google Sheets · Jira · Confluence · Figma · Miro · Notion · Azure Application Insights · Mixpanel · Amplitude · Zendesk

Frameworks: Jobs-to-be-Done (JTBD) · OKRs · North Star Metrics · KPI Definition · RACI · Design Thinking · Product Lifecycle Management

Domain & Technical: Enterprise SaaS · RPA & Agentic AI Automation · GenAI Products · Workflow & Scheduling Automation · Cloud Distributed Systems · CI/CD · API Integration

PROFESSIONAL EXPERIENCE

Senior Product Support Engineer | UiPath — Global Enterprise Automation Platform *2023 – Present / Hyderabad*

- **Customer Discovery:** Conducted user research and discovery interviews with 50+ enterprise customers to identify systemic gaps in scheduling and capacity planning workflows; synthesized insights into structured roadmap inputs that drove prioritization of 50+ platform-level enhancements.
- **Requirements Authorship:** Defined product requirements and authored structured product briefs for engineering teams across 100+ critical production incidents; introduced diagnostic frameworks that reduced repeat incidents by 30% YoY and improved first-response effectiveness by 25%.
- **Cross-Product Strategy:** Identified cross-product friction across Orchestrator, Integration Service, Communication Mining, and agentic workflows; partnered with Product Managers to validate fixes in live enterprise environments and measured post-launch impact on adoption and reliability.
- **Stakeholder Influence:** Delivered written product insights and pattern analyses to Product and Engineering leadership, influencing platform-level roadmap decisions across a suite supporting 1,000+ robot deployments and 10M+ monthly transactions.
- **Voice of Customer:** Served as the customer voice during executive prioritization cycles, representing the needs of 50+ enterprise accounts and advocating for high-impact scheduling, reliability, and platform UX improvements.

Product Support Engineer II | UiPath *2020 – 2023 / Hyderabad*

- **Roadmap Feedback Loop:** Managed 200+ enterprise production cases annually; surfaced recurring planning and scheduling friction and delivered structured product feedback to roadmap owners, contributing to multiple shipped platform improvements.

- **Process Improvement:** Drove adoption of new diagnostic tooling and escalation frameworks across a team of 5+ engineers, reducing escalations by 15% and lifting resolution quality across high-volume, SLA-driven operations.
- **Defect Triage & Specs:** Authored 40+ structured defect reports with full reproduction steps, root cause analysis, and customer impact scoping; accelerated engineering bug validation cycles and patch release timelines.
- **Data-Driven Insights:** Performed deep log analysis and cross-layer troubleshooting across infrastructure, robot runtime, and orchestration layers; surfaced data-backed patterns that informed platform reliability roadmap decisions.

Product Consultant | UiPath

2018 – 2020 | Hyderabad

- **Customer Advisory:** Advised 30+ enterprise customers on automation architecture and capacity planning strategy, improving bot execution stability by 20–30% through targeted performance and configuration assessments.
- **Solution Design:** Designed scalable automation frameworks for multi-region deployments in partnership with customer Centres of Excellence, aligning tooling decisions with long-term operational scale goals.

KEY PROJECTS

ISB Capstone — UiPath Integration Genie | Full Product Strategy

- Delivered end-to-end product plan for a GenAI-powered enterprise automation product covering customer discovery, market sizing (TAM/SAM/SOM), MVP definition, pricing strategy, and GTM execution — applying the full PM lifecycle from problem discovery to launch readiness.

Starwardz — Gamified Knowledge Platform | Internal Product Launch

- Designed, scoped, and launched a Slack-based gamification system to reward knowledge sharing across support teams; drove cross-team adoption, converted peer solutions into reusable assets, and measurably improved onboarding speed and cross-team problem resolution.

COE Automation — AI-Powered Support Agent

- Conceptualized and built an AI assistant that analyzes case history and recommends next troubleshooting steps; reduced manual research time and improved resolution speed and consistency for engineers managing high-volume SLA-driven queues.

EDUCATION

Post-Graduate Programme in Product Management & GenAI

Indian School of Business (ISB) - 2025

Post-Graduate Diploma in Advanced Computing

CDAC - 2018

B.S. Electronics and Communication Engineering

Jyothishmathi Institute of Technology and Science - 2017

CERTIFICATIONS

- AWS Cloud Fundamentals
- Microsoft Azure AI Fundamentals · Microsoft Azure Fundamentals
- UiPath Agentic Automation Associate
- UiPath Certified Automation Developer — Associate & Professional
